FAQ

Q:Is melamine a good material for kitchen cabinets?

Melamine is one of the most durable cabinet materials on the market today, noted for its strong resistance to excessive moisture, heat, and stains. Since the resin-filled paper is permanently fused to the particleboard substrate, melamine will not peel away.

Q:What is the most durable kitchen cabinet finish?

Melamine finishes are some of the most durable and versatile cabinet finishes out there! Cabinets with a melamine finish are made by heat-sealing thermally fused melamine resin (TFM) to a hard wood substrate such as pressed wood, medium-density fiberboard, or plywood.
